

# THE BRIDGE COLLEGE

## Certificate Programs

The Bridge College is partnering with **Life Pacific University** to offer **Certificate Programs** at an affordable rate.

### **What is the Certificate Program?**

The certificate programs offered through LPU are designed to equip individuals with the necessary skills to advance their career or further their education. Getting started is easy and we are committed to supporting you every step of the way.

The online certificate program is designed to be a not-for-credit program, which allows LPU to offer it at an affordable cost. Students can choose between a *Standard Track* and an *Advanced Track*. Those in the Advanced Track will complete additional work that provides the opportunity to qualify for Credit for Prior Learning towards an accredited degree program at LPU. With this program, students have the flexibility to pursue their interests and gain valuable knowledge and skills without committing to a full degree program.

### **Schedule & Workload**

Each course in the Standard Track is estimated to take around 40 hours, while courses in the Advanced Track may require approximately 80 hours due to additional requirements. You have the flexibility to complete the courses at your own pace and on your own time. Besides, you will be invited to attend virtual webinars and events to interact with other students in the program.

## Quality & Flexibility

### **Why The Bridge College?**

The Site Director and other staff at The Bridge College are here to help facilitate your on-site student experience while you are completing your certificate online. Because The Bridge College focuses on the holistic development of its students, there will be intentional engagement from The Bridge College staff to help ensure your success academically, personally and spiritually.
